 - c) Cast Iron Hood
 - d) UVX Manhole Cover.

FAMILY OF CAST IRONS

Cast-iron foundries produce over a million tons of castings monthly, and thus supply more than twice as much casting weight as all other non-ferrous foundries combined. Iron foundries are found everywhere that manufacturing occurs. The demand for iron castings is based on the nature of cast irons as engineering materials and their economic cost advantages. Cast iron offer a tremendous range of the metallic properties of strength, cost advantages. Cast iron offer a tremendous range of the metallic properties of hardness, machinability, were resistance, abrasion resistance and corrosion resistance and other properties.

Further more, the foundry properties of cast irons in terms of yield, fluidity, shrinkage, casting soundness and others make the material highly desirable forecasting purposes. From all standpoints, the cast-iron family offers a variety of engineering properties which ensure its continued and wide-spread use.

CAST IRON

SELECTING THE RIGHT PRODUCT BASED ON BRITISH STANDARD LOADINGS

Manhole Covers and Frames

D

Grade D

Manhole cover & frames capable of bearing wheel loads of up to 11.5 tonnes. For use in carriageways carrying fast moving vehicles, such as motorways, trunk roads and other primary routes. Incorporating a non-rock design feature such as three point suspension or machined seatings. Grade D products are tested under a minimum 40 tonnes load.

A

Grade A

Manhole covers & frames capable for use in carriageways carrying vehicles with wheel loads of up to 11.5 tonnes. Incorporating a non-rock design feature such as three point suspensions or machined seatings. Grade A products are tested under a minimum 35 tonnes load.

B1

Grade B1

Manhole covers & frames capable of carrying wheel loads of up to 5 tonnes, for use in carriageways carrying relatively slow moving normal commercial vehicles, such as minor residential and cul-de-sacs. Incorporating a non-rock design feature such as three point suspension or machined seatings.

B2

Grade B2

Sealed manhole covers & frames capable of carrying wheel loads of up to 5 tonnes, for use in areas where vehicles would only have occasional access such as pedestrian precincts.

C

Grade C

Sealed inspection covers & Covers & frames for use in areas inaccessible vehicles.

Road Gratings and Frames

A1

Grade A1

Gully Gratings and frames capable of bearing wheel loads of up to 11.5 tonnes, for use in carriage ways. Incorporating a non-rock design feature such as three point suspension or machined seatings.

A2

Grade A2

Hinged Gully gratings and frames capable of bearing wheel loads of up to 11.5 tonnes, for use in carriageways.

B

Grade A2

Hinged Gully gratings and frames capable of bearing wheel loads of up to 5 tonnes, for use in carriageways carrying relatively slow moving normal commercial vehicles, such as minor residential roads and cul-de-sacs.

FOOT STEP

DUCTILE IRON FOOT STEP

CAST IRON FOOT STEP

MILD STEEL FORGED FOOT STEP

PVC Steel Reinforce Foot Steps

Step Safe is a uniquely designed manhole safety step (also known as footrest) made from polypropylene and steel composite. It offers superior resistance to corrosive environments characteristic of sanitary sewers. In addition, the unique slip resistant design and bright colours provide added safety to the cleaning personnel.

Step Safe suitable for sewerline manholes, overhead water tanks and service shafts of multistory building.

Step Safe is available in five different sizes/shapes/colour.

Specifications:

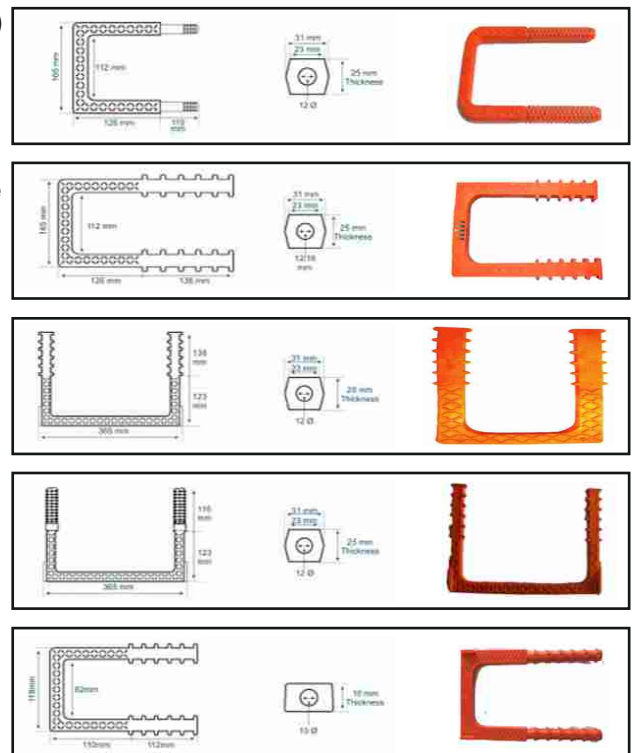

Polypropylene - 3mm thick copolymer polypropylene conforming to ASTM D-4101/IS 1786

Steel - 10/16 mm diameter steel bar conforming to IS 1786

Load Requirement - Easily exceeds 225 kg as per IS-5455

Surface Finish - 2mm tread on top surface by ribbing or chequering.

Application - Sewer Line Manhole over head tank.

Specifications: Polypropylene element conforming ASTM D-4101, Injection moulded over, reinforced steel bar Indian Standard Specification 1786 grade FE-415 steel (Options: 12 mm dia steel or 16 mm dia galvanised steel) meets load requirements of 225 kgs. As per Indian Specification-5455.

Installation : Step can be cast - in place. **Megacity** Safe Step can resist capacity over 500 kgs approx.

Longevity : Polypropylene is known for its high resistance capacity for all types of corrosive environments normally found in sewers.

Safety Features : This step with Anti Skid Design, High Stability, Fire & Rust Proof.

ANNOUNCING THE REDESIGNED **WWW.KAJWORLD.COM**

We've completely overhauled our website to ensure you can find the information you need as quickly and easily as possible. The ****new and improved KAJWORLD.COM**** now offers instant access to our entire range of fully searchable products, along with the very latest datasheets, guides, and videos.

Key New Features

Up-to-Date Product Data

The new layout makes it simple to navigate and search for products. You'll find current, essential information, including:

Datasheets

Product images and dimensions

Guides and videos

Enhanced Technical Support

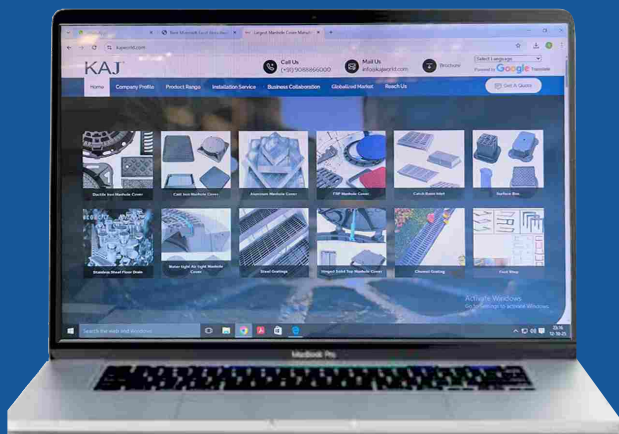

Building on our strong reputation in the civil engineering field, our revamped Technical Centre provides extensive support. It features a wealth of articles, blogs, documents (Doqs), and "how-to" guides, ensuring expert help is always available.
